Editing Reports from Workflows

View your Workflows report

Change the margins to at least Narrow

Click on Page Layout

Click on Margins

Click on Narrow. If you want to make the margins smaller, click on Custom Margins at the bottom.

Now remove the report title and the date the report was run.

Click on Home

Highlight the Title

Copy the highlighted text

Click Replace

Paste in the Find what:

At the end of the text line put in a paragraph mark (^p)

Leave Replace with: blank

Click on Replace All

Remove the blank line next

Highlight the blank line that is between the title and the date

Copy the blank line

Click Replace

Paste in the Find what:

At the end of the blank line put in a paragraph mark (^p)

Leave Replace with: blank

Click on Replace All

Remove the date of the report next

Highlight the Date of the report

Copy the highlighted text

Click Replace

Paste in the Find what:

At the end of the text line put in a paragraph mark (^p)

Leave Replace with: blank

Click on Replace All

Remove extra blank lines

Click on Replace

In the Find what: field type 2 or 3 paragraph marks (^p^p)

In the Replace with: field type 1 or 2 paragraph marks (^p)

Click on Replace All, Repeat the Replace All until you only have one or two lines being replaced.

Now your report should be a little easier to read and you can finish editing it manually.

If you plan on importing your report into Excel you will need to save the report as a txt file.

Click on the Microsoft Office Button in the upper left corner

Mouse over Save As

Click on Other Formats

Save as type: change to Plain Text (*.txt)

Importing Reports

Click on Data

Click on from Text

Navigate to where you saved your report

Highlight the report

Click on Import

Choose either Delimited or Fixed width (Delimited is defaulted)

Click Next

If you Chose Delimited you need to select what you want to use as the Delimiter

Click Next

Highlight each column and choose the Data Format

Click Finish

Where do you want to put the data? The default will be the cell you are in, if you are in the first cell and that is where you want to put the data click OK otherwise type the cell you want the data to go in.

Now you can edit, sort and manipulate the data.
