

How to set Workflows to allow multiple windows or tabs.

Click on Preference

Click on Desktop

Click on Desktop Setup

Scroll to the Bottom

Put a check mark in either Multiple Windows Mode or Tabbed Windows.

If you want the windows to be tabbed so you can select them easily choose either Tabbed Windows or

Tabbed windows on bottom

Click OK

You will receive a pop up box that says "These changes will not go into effect until you restart the workstation."

Click OK

Close Workflows

Save the properties when prompted

Open Workflows

You should now have Multiple or Tabbed Windows.
